

Valor Concepts, LLC

"Concept to Completion"

IT NETWORK

Running an enterprise security system efficiently and effectively requires not only in-depth knowledge of the system software, but also experience. Properly setting up the software and database information using naming conventions and standardization to keep data integrity can be overwhelming. Our staff at Valor concepts earn many advanced degrees and certifications in multiple fields related to Security, Software, Databases and

other popular technologies. Listed are areas in which we can assist:

SOFTWARE/ DATABASE CATEGORIES

- Network Design
- Network Security
- Ethical Hacking
- Database Linkage
- Database Conversions
- Software Development
- Software Enhancements
- Special Applications
- Document Automation
- Document Design
